Portfolio: <https://ivanTemelkov.github.io/portfolio/>

PROFILE

Senior Software Developer focused on .NET, Blazor Server, and SQL Server for industrial and enterprise environments. Software-focused roles since 2018, with earlier engineering experience in technical tooling and configurators. Experienced in MES, Industry 4.0, industrial integrations, custom frameworks, stakeholder-facing requirements analysis, and predominantly remote hybrid work.

SELECTED TECHNICAL HIGHLIGHT - Configurable MES Operator UI Framework

Designed and evolved a reusable, XML-driven GUI framework that separates a stable Blazor/.NET foundation from customer-specific templates and SQL-backed data contexts. The approach supports configurable operator screens, dashboards, machine-state views, and plant-floor interfaces while reducing duplicated one-off implementation work.

PROFESSIONAL EXPERIENCE

05/2022 - Present

Limena (PD), Italy

Senior Software Developer *Link Management Srl*

- Designed and developed a proprietary framework for dynamic GUI generation, enabling rapid development of Single Page Applications.
- Implemented .NET 10 and Blazor Server applications tailored to client-specific requirements in MES and industrial contexts.
- Defined application architecture, reusable components, and technical design decisions for maintainable framework code.
- Integrated SQL Server and OPC UA as data sources within the framework.
- Conducted requirements analysis directly with stakeholders and translated production workflows into usable software behavior.
- Maintained codebases, managed releases, supported DevOps activities, and provided technical support to internal consultants.
- Worked in a hybrid setup, predominantly remote.

09/2019 - 04/2022

Sarego (VI), Italy

Software Developer *Salvagnini Italia Spa*

- Developed a proprietary production management system using C# and WPF.
- Built custom software solutions from customer requirements and direct client analysis.
- Implemented TCP/IP-based communication with cutting and forming machines.
- Integrated production systems with ERP platforms using SQL Server.
- Installed, configured, customized, trained users, and supported applications after deployment.

01/2018 - 08/2019

Limena (PD), Italy

MES Consultant / System Integrator *Link Management Srl*

- Installed, customized, and integrated MES software with ERP systems.
- Developed customer-specific applications using C#, Node.js, and SQL Server.
- Integrated industrial systems using Modbus and customized products with T-SQL, JavaScript, HTML, and CSS.

EARLIER PROFESSIONAL EXPERIENCE

11/2010 - 10/2017 Adro (BS), Italy	Structural Engineer / Technical Developer <i>Rizzi Engineering</i> - Developed internal tools for the technical department using C# and VBA. - Created product configurators for Autodesk Inventor and designed metal structures using 2D/3D CAD tools.
--	--

EDUCATION

1997 - 2002 Sofia, Bulgaria	Master's Degree in Structural Engineering <i>University of Architecture, Civil Engineering and Geodesy</i>
